Written Responses

The in-class activities were helpful in helping me understand the concepts from the lectures. The readings were also helpful in applying the concepts from lecture to real-world scenarios, but some of the readings were hard to understand.

I found the in class lectures / discussions quite interesting and helpful to my understanding of the concepts in the course.

I think the in class discussions really helped to develop my understanding of for the materials in this course.

The in class discussions were most helpful.

Class seminars and weekly news forum help engage my thinking and application of concepts learned in class current event around the world.

class readings, they are helpful for understanding things outside og the lecture

My favorite activities were class discussions where Prof. Long sat with us and we talked about the lecture topic in class for that day.

I really loved the in class games -- they got the lesson across effectively and made class really engaging. Class discussions and readings were also really helpful.

In class lecture slides and discussions were most helpful.

The games help me understand the economic concepts that is being covered in class.

I think the class discussion was very helpful to discuss about topics we were confused on.

In class discussions really helped me because I learned a lot from others' ideas, which helped form my own perspective towards a topic.

Lectures provided time to learn about topics both in application and theoretical

I found the in class discussions very helpful. I think lectures were less helpful because it didn't engage the class.

What activities of the course were most helpful for you, and why? 14

Written comments on drafts were helpful in identifying what needed fixing. In person meetings were also helpful because it let me ask direct and clarifying questions.

I found the feedback provided by my instructor on my written assignments and projects quite helpful in helping me better understand the main themes of the course, improve my ability to write research papers, and better the quality of my assignments.

Written comments from my instructor were most helpful to me as they provided a lot of insight on what I needed to focus on and what I should do differently.

In person meetings and emails were extremely helpful.

Individual feedback through meetings both in person and on zoom were most helpful.

in person discussion

Prof. Long puts so much effort into reading our work and providing thoughtful, suggestive feedback through written comments. Her comments were always telling me what I needed to improve on and what steps I could take to do this.

I really appreciated all the detailed feedback on written assignments, like my essays and annotations. They really helped me understand the material better.

Comments on papers were really helpful since they are really specific and tells you exactly how to make your paper more informative

feedbacks from my draft is really helpful

The one on one meeting time about my paper was very helpful for me to articulate my thoughts and understand what I need to do better.

Written comments on the google doc and in person meetings helped a lot, because prof. Long provided really detailed feedbacks.

In person discussions help guild me through the class and how I could improve

Comments on my writing were very helpful.

What forms of feedback from your instructor were most helpful for you, and why? 14

The student-student interactions were helpful because it helped build a little community within the class where everyone knew each other and we could ask each other for help. The student-instructor dynamics were also helpful in creating a positive learning environment because it made it really easy to talk about class topics and ask questions.

I found the learning environment as a very positive factor of this course. I felt willing to say my ideas and learn from my classmates throughout the course.

I think the many interactions with other students in open discussions along with the encouraged use of the whiteboards to write stuff down helped.

The small seminar style environment helped make speaking feel more comfortable.

The collaborative environment of the class when split into group made it easy to connect with other students and ask questions. However, collaborating on a whole class level scale was a bit challenging at times due to nervousness.

small group discussion is really helpful

The classroom environment was my favorite this semester. I always felt that my thoughts were welcomed and I always comfortable enough to participate in class discussions even though I'm a very shy person.

It's really good that Professor made it a positive learning environment and making it a safe ppl age to share opinion

the students in this class are very supportive and the professor is very responsible and resourceful.

I think I got very closed to my classmates from this small classroom setting.

Class dynamics is pretty chill, and everyone is actively engaging the class.

The enviroment was welcoming allowing for friendly discussion and learning environment

The learning environment was very collaborative and safe. I found it very helpful.

How do the learning environment affect your learning? 13

What would have improved your learning in this course? 9

I think getting more of an introduction to finding sources and writing research papers could have been helpful but I still felt prepared from the instruction.

I think if the readings were less dense it would have helped a lot.

I think that having more workshops for the paper will be best.

More small groups based work rather than individual or entire class organized work.

Taking economics course prior to this class

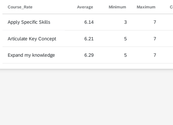

The course feels like it is a bit too much non-entry level information for an entry level course. Or it is too much information together that it throws me off sometimes.

I would have more time to prepare some of the presentation materials.
